Jetson Platform OpenClaw Quick Start

OpenClaw, together with the Alibaba Bailian plugin, has already been configured in the image we provide. You can follow this tutorial to start OpenClaw quickly and try out its features.

1. Initial Configuration

```
vim ~/.openclaw/openclaw.json
```

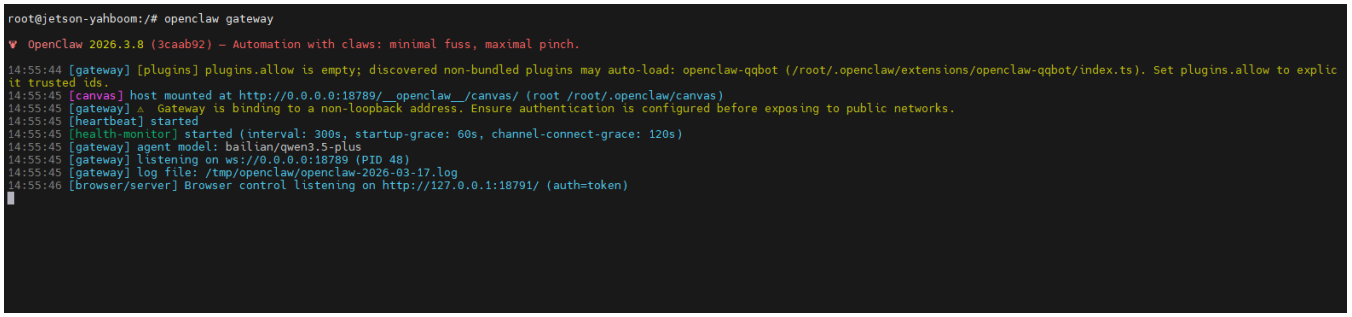

Fill in the key you obtained from the Bailian large model platform into the apiKey under bailian. **How to obtain an API Key**: https://bailian.console.aliyun.com/

2. Starting OpenClaw

Start the Gateway in one terminal

```
openclaw gateway
```

Use the TUI interface in another terminal:

```
openclaw tui
```

> Note: The Bailian qwen3.5-plus model is used by default. You can type /models to select another model. Since only the Bailian model has been configured, the other non-Bailian models cannot be used.

🎯 Feature List

Available once the Bailian API Key is configured:

Feature	Description	Example
🎨 Image generation	Text-to-image, image editing, image translation	"Generate an image of a cat"
🎬 Video generation	Image-to-video	"Turn this picture into a video"
🎵 Speech synthesis	Multi-character dubbing (CosyVoice)	"Read this aloud in a gentle voice..."
🎤 Speech recognition	Speech to text	"Recognize this audio

💬 Usage Examples

Image Generation

```
User: Generate a cute cat picture
AI: [Image generated]
```

Speech Synthesis

```
User: Read "Before my bed a bright moon shines, as though frost lay on the ground" in a gentle female voice
AI: [Audio file generated]
```

📁 Directory Structure

```
~/.openclaw/
├── .env              # API Key configuration
├── openclaw.json     # Main configuration file
├── setup.sh          # One-click configuration script
└── workspace/
    ├── skills/       # Skills directory
    │   ├── aliyun-image/          # Image generation
    │   ├── alicloud-ai-audio-tts/ # Speech synthesis
    │   ├── alicloud-ai-audio-asr/ # Speech recognition
    │   └── alicloud-ai-video-wan-video/ # Video generation
    ├── MEMORY.md     # AI long-term memory
    └── USER.md       # User information
```

🔧 Common Commands

```bash
# Start OpenClaw
openclaw

# TUI interface
openclaw tui

# Check the status
openclaw status

# Configuration wizard
openclaw wizard

# View the skills
openclaw skills list

# Help
openclaw --help
```

🎭 Available Voices (Speech Synthesis)

Based on Bailian's CosyVoice-v2

Character	Voice	Characteristics
Elderly man	longyichen	Steady, narrative
Young woman	longanrou	Gentle, natural
Young man	longhan_v2	Clear, steady
Little girl	longhuhu	Lively, cute
Little boy	longniuniu	Childlike, lively
