Development board: Jetson Orin series mainboard

Meta Llama3.2 is a series of advanced open source large language models (LLMs) developed by the Meta AI division.

1. Model size

Model	Size
llama3.2:1b	1.3GB
llama3.2:3b	2.0GB

2. Performance

Lightweight instruction-tuned benchmarks

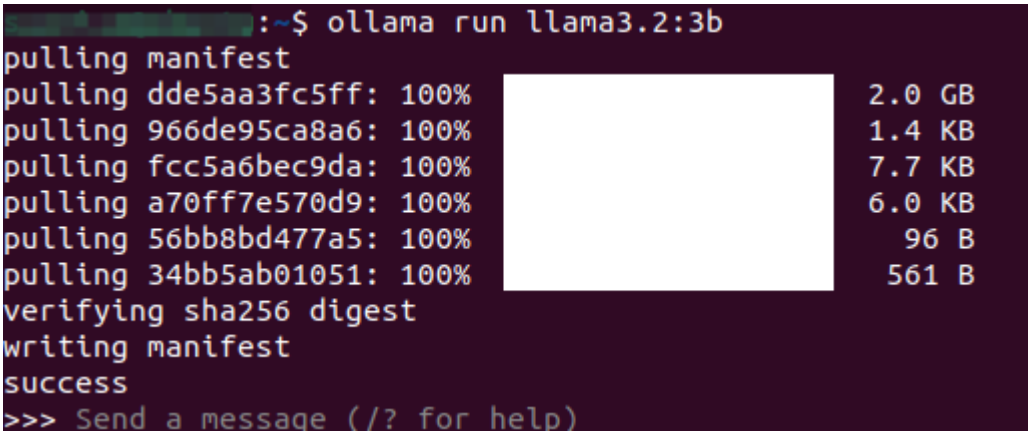

Category / Benchmark	Llama 3.2 1B	Llama 3.2 3B	Gemma 2 2B IT (measured)	Phi-3.5-mini IT (measured)
General — MMLU (5-shot)	49.3	63.4	57.8	**69.0**
Open-rewrite eval (0-shot, rougeL)	**41.6**	40.1	31.2	34.5
TLDR9+ (test, 1-shot, rougeL)	16.8	**19.0**	13.9	12.8
IFEval	59.5	**77.4**	61.9	59.2
Tool Use — BFCL V2	25.7	**67.0**	27.4	58.4
Nexus	13.5	**34.3**	21.0	26.1
Math — GSM8K (8-shot, CoT)	44.4	77.7	62.5	**86.2**
MATH (0-shot, CoT)	30.6	**48.0**	23.8	44.2
Reasoning — ARC Challenge (0-shot)	59.4	78.6	76.7	**87.4**
GPQA (0-shot)	27.2	**32.8**	27.5	31.9
Hellaswag (0-shot)	41.2	69.8	61.1	**81.4**
Long Context — InfiniteBench/En.MC (128k)	38.0	63.3	—	39.2
InfiniteBench/En.QA (128k)	20.3	19.8	—	11.3
NIH/Multi-needle	75.0	84.7	—	52.7
Multilingual — MGSM (0-shot, CoT)	24.5	**58.2**	40.2	49.8

3. Using Llama3.2

3.1 Run Llama3.2

Use the run command to start the model; if the model has not been downloaded before, it is pulled automatically from the Ollama model library:

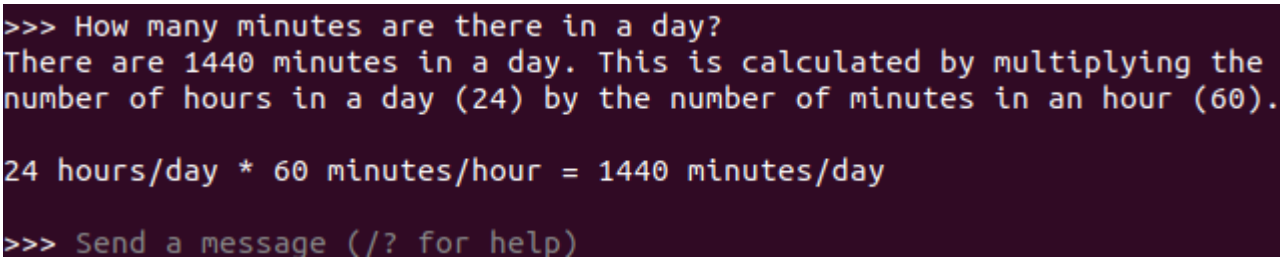

```
ollama run llama3.2:3b
```

3.2 Start a conversation

```
How many minutes are there in a day?
```

The time it takes to answer depends on the hardware configuration, so be patient!

3.3 End the conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!
