Development board: Jetson Orin series mainboard

Phi-4-mini-instruct is a lightweight open model built on synthetic data and curated public web content, focused on high-quality, reasoning-intensive data.

1. Model size

Model	Size
phi4-mini:3.8b	2.5GB

2. Performance

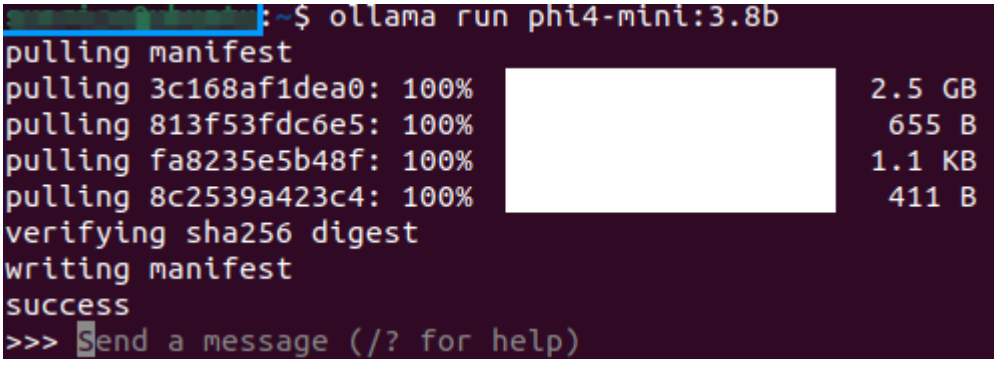

3. Using Phi4-mini

3.1 Run Phi4-mini

Use the run command to start the model; if the model has not been downloaded before, it is pulled automatically from the Ollama model library:

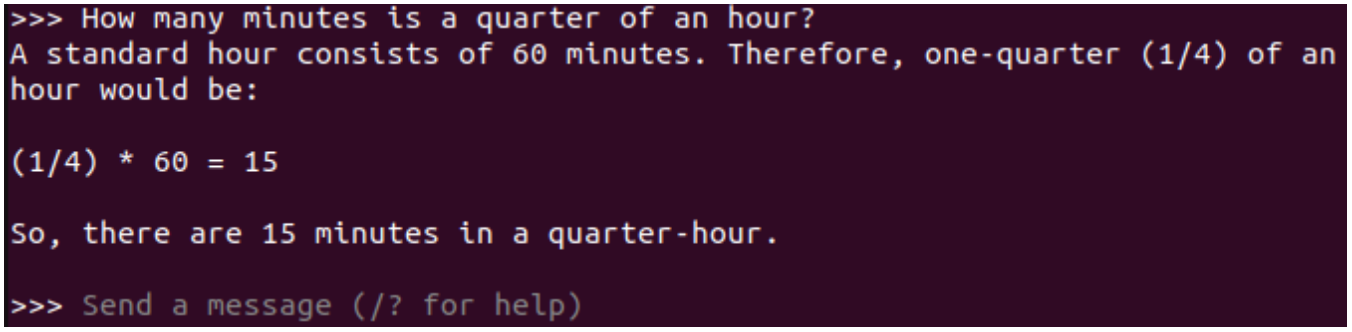

```
ollama run phi4-mini:3.8b
```

3.2 Start a conversation

```
How many minutes is a quarter of an hour?
```

The time it takes to answer depends on the hardware configuration, so be patient!

3.3 End the conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!
