Development board: Jetson Orin series mainboard

1. Model size

Model	Size
llava:7b	4.7GB

2. Performance

3. Using Llava

3.1 Run Llava

Use the run command to start the model; if the model has not been downloaded before, it is pulled automatically from the Ollama model library:

```
ollama run llava:7b
```

```
[redacted]:~$ ollama run llava:7b
pulling manifest
pulling 170370233dd5: 100% [redacted] 4.1 GB
pulling 72d6f08a42f6: 100%            624 MB
pulling 43070e2d4e53: 100%             11 KB
pulling c43332387573: 100%             67 B
pulling ed11eda7790d: 100%             30 B
pulling 7c658f9561e5: 100%            564 B
verifying sha256 digest
writing manifest
success
>>> Send a message (/? for help)
```

3.2 Start a conversation

```
How many minutes is half an hour?
```

The time it takes to answer depends on the hardware configuration, so be patient!

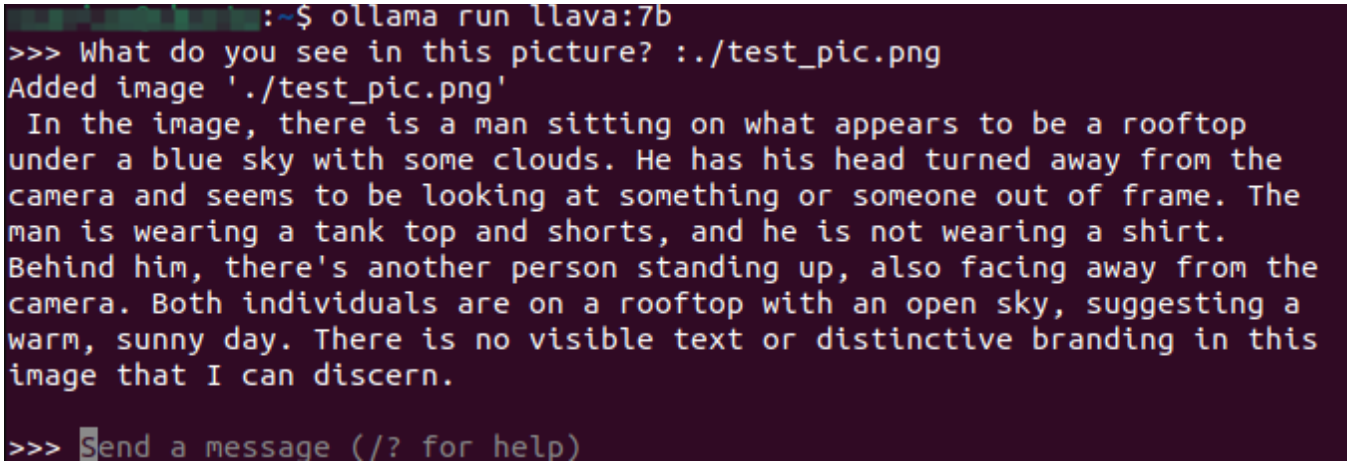

```
>>> How many minutes is half an hour?
 Half an hour is 30 minutes.

>>> Send a message (/? for help)
```

3.3 Vision function

```
What do you see in this picture? :./test_pic.png
# Using ": + the absolute path of the image" in the conversation lets the model use its
vision function and parse the information in the image
```

3.4 End the conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation!
