  - Permission denied

MediaPipe is a cross-platform machine learning framework that can process key point detection such as hands, faces, and poses in videos and images in real time.

1. 3D object recognition

MediaPipe 3D object recognition can recognize four types of objects: shoes, chairs, cameras, and cups.

2. Preview of the effect

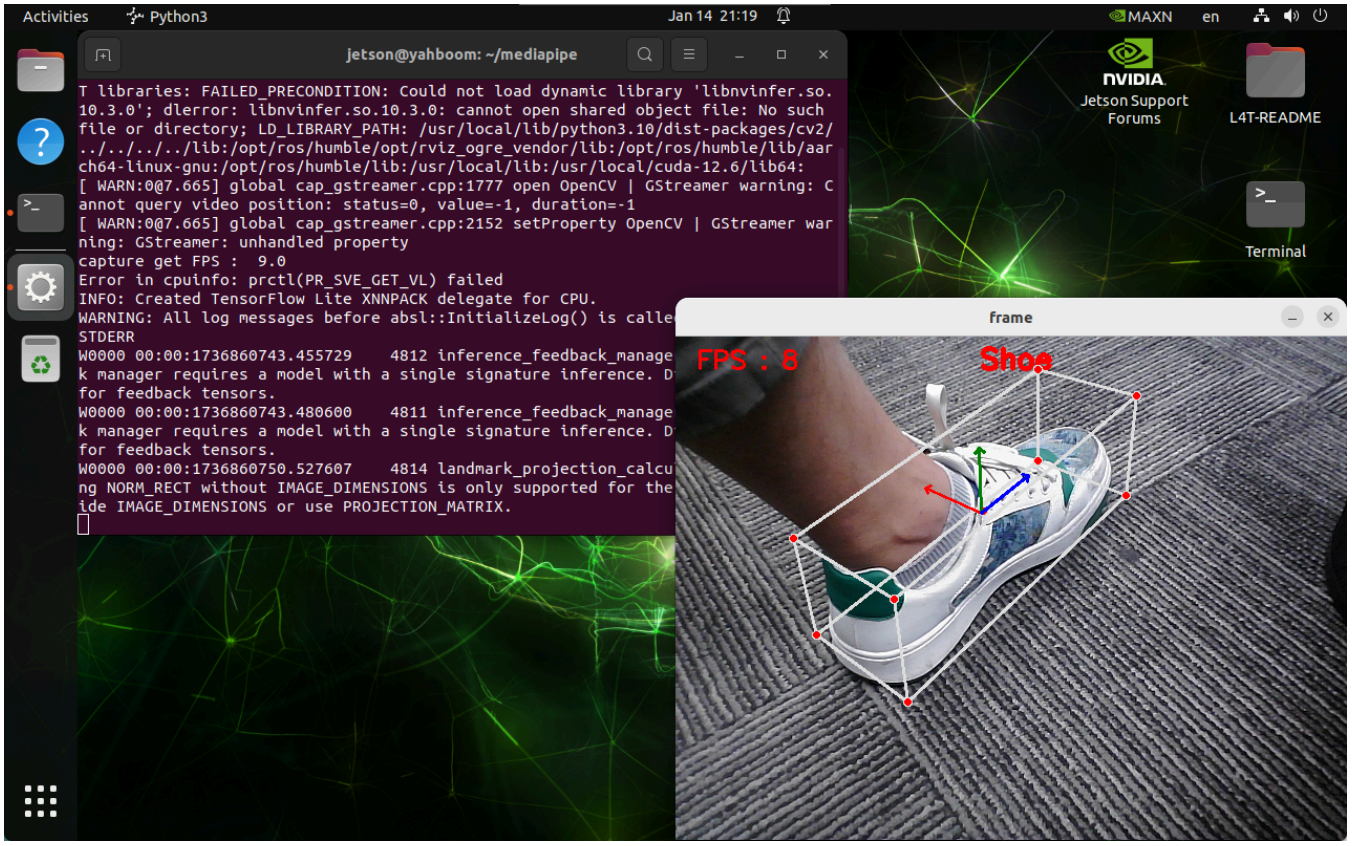

Click the preview screen and press `f` to switch the recognized 3D object model.

2.1. The USB camera

```
cd ~/mediapipe
```

```
python3 04.objectron_usb.py
```

Note: click the camera window and press `q` to exit the program!

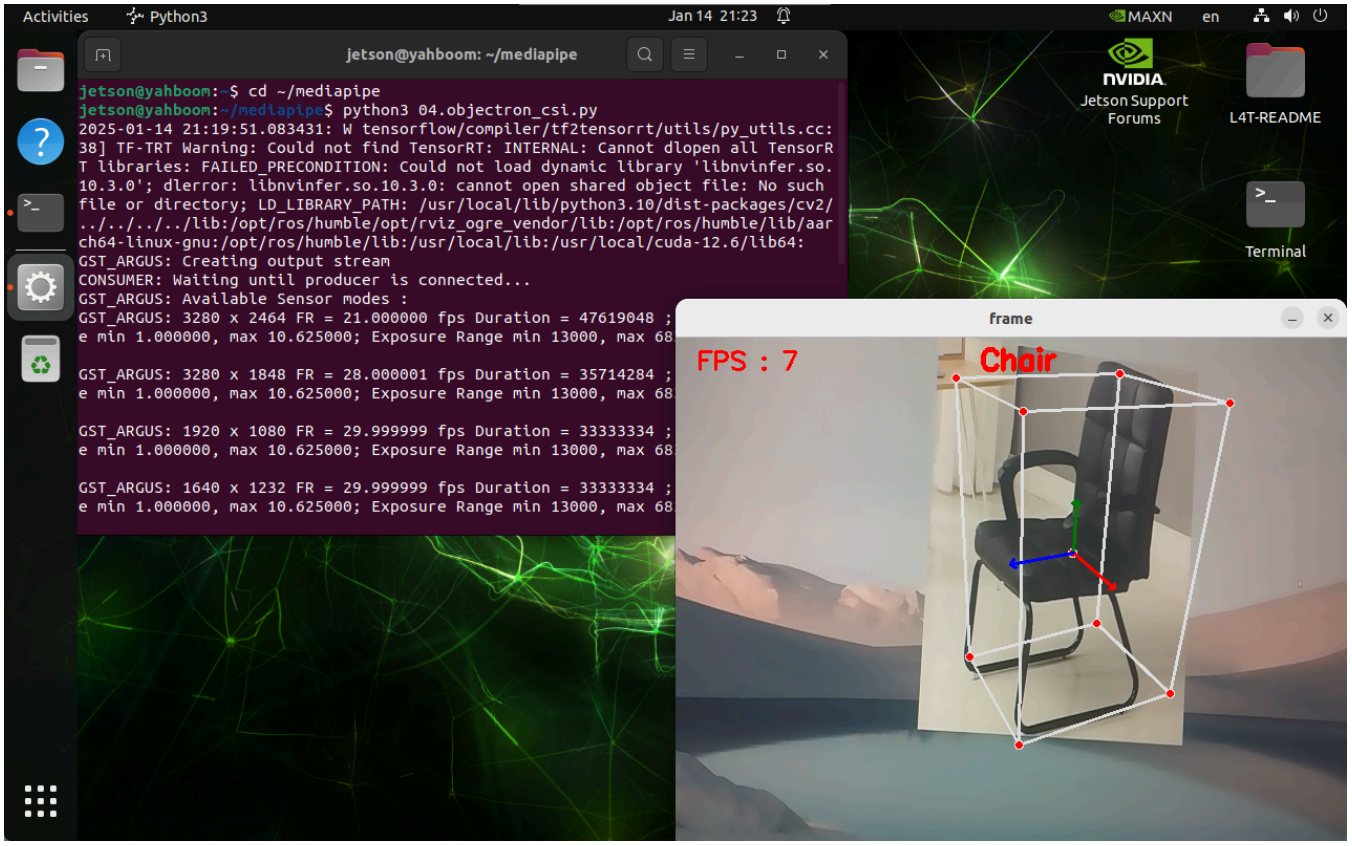

2.2. The CSI camera

```
cd ~/mediapipe
```

```
python3 04.objectron_csi.py
```

Note: click the camera window and press `q` to exit the program!

FAQ

Permission denied

PermissionError: [Errno 13] Permission denied: '/usr/local/lib/python3.10/dist-packages/mediapipe/modules/objectron/**.tflite'

Solution: Use the sudo command to run the python file, so that the program automatically downloads the required model first
